<b>Abstract</b>	<b>ii</b>
<b>Acknowledgments</b>	<b>x</b>
<b>Introduction</b>	<b>1</b>
Motivation . . . . .	1
Overview of Chapters . . . . .	21
<b>Chapter 1. Aristotle: The Grundbuch of Continuity</b>	<b>31</b>
Introduction . . . . .	31
Posterior Analytics . . . . .	39
On Infinite Demonstration . . . . .	49
Suggenicity . . . . .	68
<b>Chapter 2. Aristotle's Physics Revisited</b>	<b>79</b>
Physics Introduction . . . . .	79
The Continuity of Time . . . . .	81
On Place . . . . .	88
Continuity Defined . . . . .	93
Interlude: Metaphysics V and X . . . . .	111
Continuity Refined . . . . .	133
Conclusion . . . . .	152
<b>Chapter 3. Scotus and Oresme</b>	<b>158</b>
Introduction . . . . .	158
Brief Background . . . . .	167

	Duns Scotus . . . . .	172
	The 4 Options According to Scotus . . . . .	172
	Stepping Back: Scotism More Generally . . . . .	191
	Common natures . . . . .	208
	Oresme . . . . .	215
<b>Chapter 4.</b>	<b>Spinoza’s Physics and the Shadow of Descartes</b>	<b>237</b>
	Spinoza’s Physics . . . . .	237
	Introduction . . . . .	237
	The Physical Interlude’s Theory of Corpora Simplissima	249
	The Cartesian Account . . . . .	259
	The Cartesian Account of Local Motion . . . . .	261
	On the Charge of Circularity . . . . .	289
<b>Chapter 5.</b>	<b>Spinoza’s Theory of Composite Bodies, and Common Notions</b>	<b>307</b>
	The Physical Interlude Again . . . . .	307
	Common Notions Revisited . . . . .	335
<b>Chapter 6.</b>	<b>Sheaf Theory</b>	<b>342</b>
	Introduction . . . . .	342
	Section 2: Prelude to Sheaves: Presheaves . . . . .	350
	Philosophical Pass (1st Pass): Yoneda and Relationality	366
	A Little More on Universality . . . . .	369
	Philosophical Pass (2nd pass): Universality and Mediation	374
	More on the Presheaf Category . . . . .	376

	Philosophical Pass (3rd): Four Actions . . . . .	381
	Section 3: Sheaves . . . . .	384
	Introducing Sheaves . . . . .	384
	Initial Examples . . . . .	388
	Philosophical Pass (4th): Continuity and Generality in Local-Global Passage . . . . .	401
	Philosophical Pass (5th): Sheaf Cohomology and Re- turn of the Discrete . . . . .	405
	Section 4: A “Dialectic” between Continuity and Discreteness? . . . . .	408
	Toposes . . . . .	408
	Philosophical Pass (6th): Toposes and the Concept of Space . . . . .	414
	Geometric Morphisms . . . . .	417
	Philosophical Pass (7th): Cohesiveness; A New Di- alectical Science? . . . . .	431
	Conclusion . . . . .	433
<b>Chapter 7.</b>	<b>Conclusion</b>	<b>435</b>
	Question of Scale . . . . .	446
	Randomness . . . . .	449
	Idealization . . . . .	452
	Relation of Parts . . . . .	458
	Density . . . . .	458
	Compositional . . . . .	458
	Reflexivity . . . . .	464
	Regularity . . . . .	465

Contiguity/Positional . . . . .	466
Issue of Distinction . . . . .	466
Structural . . . . .	474
Closeness . . . . .	477
Size . . . . .	479
Passage . . . . .	481
Limit of convergent sequences inherit properties of sequence . . . . .	481
Local-Global Passage . . . . .	481
Which is Better? . . . . .	483
Continuity is “Better” . . . . .	483
Pragmatic . . . . .	483
Epistemic . . . . .	486
Aesthetic . . . . .	487
Discreteness is “Better” . . . . .	489
Deflationist . . . . .	489
Digitalists . . . . .	491
Computation Power . . . . .	492
Neither . . . . .	493
Antinomic . . . . .	493
Both . . . . .	496
Dialectical . . . . .	496
Conclusion . . . . .	496
